

10Pearls QA Internship

Assignment 1

Requirement Analysis | User Stories | Sprint Planning Submission

Name: Fatima Noor

Domain: Quality Assurance

1. Project Overview

The Online Book Store is a web-based e-commerce platform that enables customers to browse, search, and purchase books online. Users can create accounts, view book details, manage shopping carts, and complete secure online transactions. The system focuses on providing a reliable, user-friendly, and secure shopping experience.

2. Business Goal

Provide customers with a convenient platform to discover and purchase books online while ensuring secure transactions and an intuitive user experience.

3. User Expectations

Users expect to browse books easily, search efficiently, view complete book information, purchase books securely, and manage their accounts with minimal effort.

4. Assumptions

- Only registered users can complete purchases.
- Payments are handled through an integrated payment gateway.
- Books displayed in the catalog are maintained by the administrator.

5. Functional Requirements

ID	Functional Requirement	Type
FR-01	The system shall allow users to register an account.	High
FR-02	The system shall allow registered users to log in.	High
FR-03	The system shall display the available book catalog.	High
FR-04	The system shall allow users to search books by title, author, or category.	High
FR-05	The system shall display detailed information for a selected book.	High
FR-06	The system shall allow users to add books to the shopping cart.	High
FR-07	The system shall allow users to remove books from the shopping cart.	Medium
FR-08	The system shall display an order summary before checkout.	High
FR-09	The system shall allow authenticated users to complete checkout.	High

FR-10	The system shall generate an order confirmation after successful purchase.	High
FR-11	The system shall allow users to update account information.	Medium

6. Non-Functional Requirements

ID	Category	Requirement
NFR-01	Performance	Pages load within 2 seconds.
NFR-02	Security	Passwords encrypted and HTTPS enforced.
NFR-03	Availability	99.9% uptime excluding maintenance.
NFR-04	Usability	Responsive on desktop, tablet, and mobile.

7. User Stories

US-01	As a visitor, I want to browse the book catalog so that I can explore available books.
US-02	As a visitor, I want to search books by title, author, or category so that I can quickly find books.
US-03	As a customer, I want to view detailed book information so that I can make an informed purchase.
US-04	As a customer, I want to add books to my cart so that I can purchase multiple books.
US-05	As a customer, I want to remove books from my cart so that I can modify my order.
US-06	As a registered customer, I want to complete payment securely so that I can purchase books online.
US-07	As a registered customer, I want to manage my account so that my information remains updated.

8. Acceptance Criteria

Scenario-01: Registration

Given the user is on the registration page

When valid information is submitted

Then the account shall be created successfully.

Scenario-02: Login

Given a registered user

When valid credentials are entered

Then access shall be granted.

Scenario-03: Invalid Login

Given the login page

When invalid credentials are entered

Then an error message shall be displayed.

Scenario-04: Search

Given the homepage

When the user searches by title, author, or category

Then matching books shall be displayed.

Scenario-05: No Results

Given the homepage

When no matching books exist

Then 'No books found' shall be displayed.

Scenario-06: Book Details

Given a selected book

When its details page opens

Then the title, author, ISBN, category, price, description and availability shall be displayed.

Scenario-07: Add to Cart

Given an available book

When Add to Cart is clicked

Then the book shall be added to the cart.

Scenario-08: Remove from Cart

Given items in the cart

When one item is removed

Then the cart total shall update.

Scenario-09: Checkout

Given a logged-in user with items in the cart

When payment succeeds

Then the order shall be confirmed.

Scenario-10: Payment Failure

Given checkout

When payment fails

Then no order shall be created.

Scenario-11: Update Profile

Given a logged-in user

When valid profile information is saved

Then the profile shall be updated.

9. Sprint Planning (Assumption)

Assumption: For the purpose of this assignment, it is assumed that the Online Book Store project follows the Agile Scrum methodology with a two-week sprint (10 working days).

Sprint Goal

Deliver the core functionalities of the Online Book Store, including user registration, browsing books, searching books, shopping cart management, and online checkout.

Sprint Duration

- Sprint Length: 2 Weeks (10 Working Days)
- Methodology: Agile Scrum

Sprint Backlog

User Story	Description	Priority	Story Points
US-01	Browse book catalog	High	3
US-02	Search books	High	5
US-03	View book details	High	2
US-04	Add books to cart	High	5
US-05	Remove books from cart	Medium	2
US-06	Complete checkout	High	8
US-07	Manage user account	Medium	3
